KEEP YOUR PRECIOUS VALUABLES, DOCUMENTS & CAPITAL SAVINGS SAFE WITH SMART RANGE OF
GLADIATOR PREMIUM SAFE LOCKERS

FIRE AND BURGLAR RESISTANT SAFE

DOOR SLAB :

A fully MIG welded, multi-corner single/two joint construction makes the body from total 7mm of tested quality M.S. Plate. All 5 sides and the door of the safe are armored with a specially designed barrier material which is encased between strong outer and inner steel body to withstand the attacks of sledgehammer, power drill and chisel and impact of a fall from upper floors. The overall body thickness on all 5 sides is 100 mm (approx.) including barrier material which offers fire as well as burglar resistance as per latest edition of IS: 550

BOLT WORK MECHANISM

Each locker is fitted with high quality first class unpickable dual control 10 lever key lock. These locks are self locking so that the custodian does not have to re-lock the locker with his key after the customer has locked it. Apart from this, pad lock can also be provided so that customer can use his own padlock for more security with full confidence.

AUTOMATIC RE-LOCKING DEVICE:

With a standard feature on all models of a door, this sensitive device is triggered off-when an attack is attempted on the lock through the keyhole with any instrument. This automatic re-locking device guards all the key locks.

SAFE "C" CLASS (SINGLE DOOR)

All Sizes In Inch (H x W x D)

LOCKING SYSTEM

We use globally certified (UL Listed, Vds) best-in-class global locking systems from top brands like S&G, Dormakaba, NL, Securam, Guardman etc.

SECURAM
dormakaba

STRONG ROOM DOOR

DOOR SLAB :

The outer layer of the door slab is made of a genuine M.S. Plate of reputed brands like TATA, JINDAL, RINL, SAIL, etc. It is further reinforced by a specially designed material matrix 100 mm thick and a high carbon alloy steel plate which provides impregnable security against the most severe modern day professional attacks by LPG cutting, Oxyacetylene Cutting and Power Drilling. This multi layer protection is provided behind the entire locking system.

DOOR FRAME :

Tested quality 10 mm thick M.S. Plate is used for fabricating the one-piece-bent angle door frame. For strength and rigidity, this frame is suitably, reinforced along the height and breadth.
